

Vitacress achieves further recognition in Sustainable Business Awards

Following our success as last year's winner of the large business category in the Hampshire & Isle of Wight Sustainable Business Awards, Vitacress has achieved further recognition this year in the Leadership Category. This is a special category open only to previous Award winners, allowing them to make a distinction and showcase how previous success has inspired them to achieve even greater things.

Commenting on their reasons behind the decision, Vitacress particularly impressed the judges "with their continuing environmental improvements which include enhancing the onsite chalk streams for the invertebrate population, increasing biodiversity and enabling community involvement projects, and importantly their dedication to using and sharing their own experience to support and inspire other local businesses."
